Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

We work closely with our clients to really understand their needs and aspirations, and deliver clever and creative solutions for what are often complex design challenges. We always strive for the best outcome for our clients. We actively share knowledge and foster cooperation across our teams to bring a best practice approach to problem solving and delivery. This means our clients benefit from local insights and global skills.

Our professionals earn this kind of recognition by understanding our clients' business needs and objectives. We have the technical resources to execute projects from the most basic to the highly complex. We allow our clients to focus on their businesses and simplify their lives with a single point of contact. For more information on our IT Consulting services, please visit our Services page.

CLOUD MIGRATION

We can migrate your web application or web service to a scalable cloud hosting service like Microsoft Azure or Amazon Web Services. Migrating existing applications and data stores to the cloud can reduce your infrastructure and personnel cost, while improving flexibility, scalability and security.

WEB SOLUTIONS

We have created web applications from the ground up, working closely to establish a clear scope, requirements and project plan to meet our objectives. Our development team handled all parts of the design, coding, implementation and testing of the application.

MOBILE SOLUTIONS

We have created mobile applications from the ground up, working closely to establish a clear scope, requirements and project plan to meet our objectives. Our development team handled all parts of the design, coding, implementation and testing of the application.

- SOFTWARE PRODUCT SOLUTIONS.
- WEB APPLICATIONS.
- MOBILE APPLICATIONS.
- CLOUD ARCHITECTURE.
- SERVICE-ORIENTED ARCHITECTURE.
- AUTOMATION.

flexible solutions for your business needs

IT APPLICATION DEVELOPMENT

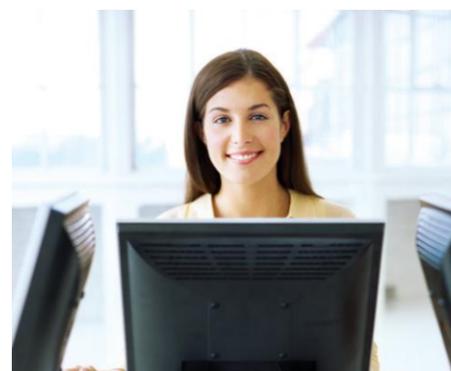

Konviere uses the right proven technologies to reduce end-user risk and provide best life-cycle benefits, and integrate smoothly with current or other technology. Our reliable technology meets performance guarantees with measurable standards for cost and schedule. Clients rely upon our technologies for project execution techniques.

As you will learn, there are many stages of any software development project. Based upon these market requirements, senior software developers create an architecture for the products along with functional and design specifications. Then the development process starts. After the initial development phase, software testing begins, and many times it is done in parallel with the development process. Documentation is also part of the development process because a product cannot be brought to market without manuals. Once development and testing are done, the software is released and the support cycle begins. This phase may include bug fixes and new releases. Konviere support all stages of the application life cycle from requirements through design, test and implementation.

TECHNOLOGY CONSULTING PROVIDES A TOTAL END TO END SOLUTION.

IT PROJECT MANAGEMENT

We all follow Project Management processes in our projects. Mostly, they are tailored to meet the requirements of the project. Some projects need tighter

control and more stringent processes that might have been mandated in the contract, while some need processes sufficient to self manage and execute the project to meet the deadlines and quality standards. To be a winner in today's competitive environment, organizations must operate as possible

in order to deliver goods and services faster, cheaper and better than their competitors. Competent project management capabilities are critical to success in this challenging environment. Whether you have a straightforward project or a program consisting of multiple related initiatives, there is a requirement for efficiency in executing and managing the required tasks to achieve the desired outcome.
